Fundada em 1934, a DRAGÃO ABRASIVOS foi pioneira em Portugal na produção de abrasivos rígidos. Tendo iniciado a sua fabricação com base nos abrasivos convencionais vitrificados, foi-se adaptando ao longo dos tempos às necessidades do mercado e alargou gradualmente a sua actividade a novos tipos de abrasivos. Salienta-se como corolário dessa evolução a criação de um departamento de ferramentas diamantadas em 1967 e em 1999, a certificação do seu sistema da qualidade segundo a norma ISO 9002, actualizada em 2002 para a norma ISO 9001:2000.

Continuamente atenta à evolução, possui um sector de investigação que, para além do estudo de novos produtos, é um garante de qualidade da sua extensa gama de fabrico, cuja distribuição se generaliza a todos os sectores da indústria, com especial destaque para os da metalomecânica, pedra e construção, fundição, afiamentos, moldes, vidro e polimentos.

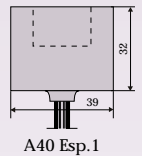

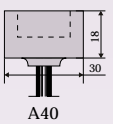

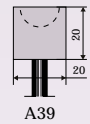

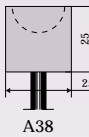

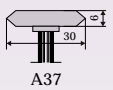

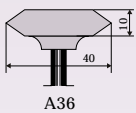

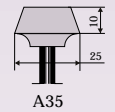

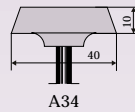

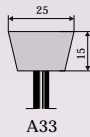

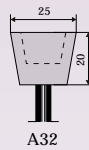

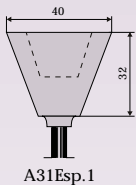

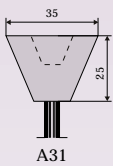

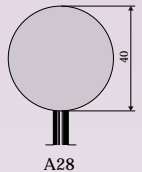

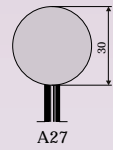

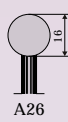

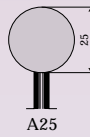

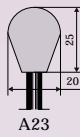

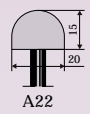

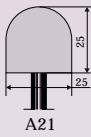

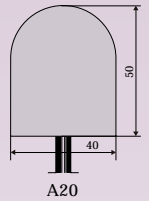

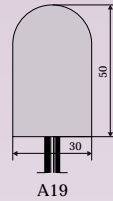

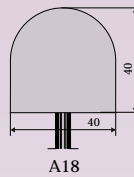

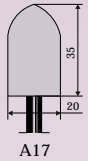

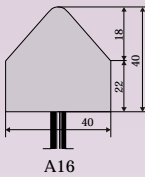

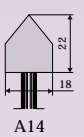

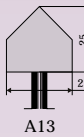

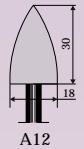

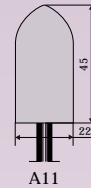

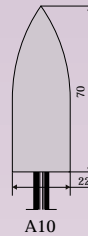

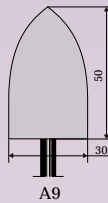

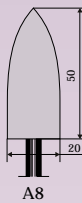

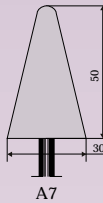

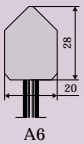

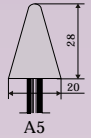

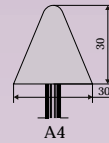

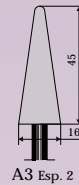

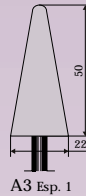

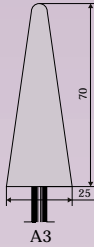

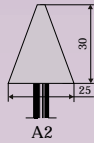

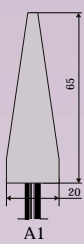

Founded in 1934, DRAGÃO ABRASIVOS was the pioneer in Portugal as bonded abrasives producer. Starting to produce vitrified bonded abrasives, its range of products grew with the market needs. Special attention is called to the construction of a new department dedicated only to diamond tools in 1967, and in 1999 the acknowledgement of its quality system according to ISO 9002, upgraded in 2002 to the ISO 9001:2000. Taking always into account the market evolution, it has a research sector that, besides developing new products, is a warranty of quality for all its wide range of products. Its sales cover almost all the market segments, specially the metal work, stone and construction, foundry, sharpening, moulds, glass and polishing industry.

Fondée en 1934, la société DRAGÃO ABRASIVOS a été la première à produire des abrasifs agglomérés au Portugal. Après avoir commencé à produire des abrasifs vitrifiés conventionnels, elle a évolué pour s'adapter aux besoins du marché, en développant des nouveaux produits. On peut distinguer comme corollaire de cette évolution l'établissement d'un secteur d'abrasifs diamantés depuis 1967 et en 1999, la certification de leur système de qualité, d'accord la norme ISO 9002, actualisé en 2002 par la norme ISO 9001:2000.

Elle a aussi un secteur d'investigation qui fait des innovations, des recherches et qui donne la garantie d'une excellente performance de toute leur série de produits, particulièrement destinés aux industries de la métallomécanique, pierre et construction, fonderie, affûtage, moules, verre et la polissure.
